EN-81, Sector-V, Salt Lake City, Kolkata – 700 091

ACKNOWLEDGEMENT

The DGT sincerely acknowledges contributions of the Industries, State Directorates, Trade Experts, Domain Experts and all others who contributed in revising the curriculum. Special acknowledgement is extended by DGT to the following expert members who had contributed immensely in this curriculum.

List of Expert members contributed/ participated for finalizing the course curriculum of TDM (Press Tools, Jigs & Fixtures) trade held on 16.05.17 at Govt. ITI- Aundh, Pune

1. COURSE INFORMATION

During the two years duration, a candidate is trained on subjects- Professional Skill, Professional Knowledge, Engineering Drawing, Workshop Science & Calculation and Employability Skills. In addition to this, a candidate is entrusted to make/do project work and Extra Curricular Activities to build up confidence. The practical skills are imparted in simple to complex manner & simultaneously theory subject is taught in the same fashion to apply cognitive knowledge while executing task.

The course covers the detail aspect of mould making& testing. The broad components covered under Professional Skill subject are as below:

1st Semester– The practical part starts with basic fitting covering components like filing, sawing, drilling, tapping, chipping, grinding and different fits. The accuracy proposed is of ± 0.05 mm and angular accuracy of 1°. Different turning operations on lathe viz., plain, facing, boring, grooving, step turning, parting, chamfering, knurling and different thread cutting by setting the different parameter, are covered in the practical part.

2ndSemester– Different milling operations (plain, stepped, angular, dovetail, T-slot, contour, gear) along with surface & cylindrical grinding to an accuracy of ± 0.02 mm are covered. In addition, solid modeling of mould in CAD & Pro E taught setting and execution of welding is also a component in this semester.

3rdSemester– Setting, operation and programming of CNC turn centre and CNC machining centre to produce components are performed in this semester. 2D & 3D machining with CAM software is also performed. Manufacture drill jig and fixture is also part of the practical. EDM & wire EDM operation to produce components with an accuracy of ± 0.02 mm is covered. Construction of blanking and piercing tool is done and testing of same is also performed.

4th Semester– Basic construction of Hydraulic & Pneumatic circuits and basic functioning of electrical circuit and sensors are covered in this semester. Construction of compound and progressive tools is done testing of same is executed. Simple repair and overhauling of different machines viz., drill, milling & lathe is covered. Making of 'V' bending tool and draw tool are carried out and testing is also undertaken.

2.1 GENERAL

The Directorate General of Training (DGT) under Ministry of Skill Development & Entrepreneurship offers a range of vocational training courses catering to the need of different sectors of Labour market. The vocational training programmes are running under the aegis of National Council of Vocational Training (NCVT). Craftsman Training Scheme (CTS) and Apprenticeship Training Scheme (ATS) are two pioneer programmes under NCVT for propagating vocational training.

TOOL & DIE MAKER (Press Tools and Jigs & Fixtures)trade under CTS is one of the popular courses delivered nationwide through network of ITIs. The course is of two years (04 semester) duration. It mainly consists of Domain area and Core area. In the Domain area, Trade Theory & Practical impart professional skills and knowledge, while Core area imparts Workshop Calculation and Science, Engineering Drawing and Employability Skills impart requisite core skill & knowledge and life skills. After passing out the training programme, the trainee is awarded National Trade Certificate (NTC) by NCVT which is recognized worldwide.

Candidates broadly need to demonstrate that they are able to:

- Read & interpret technical parameters/documentation, plan and organize work processes, identify necessary materials and tools;
- Perform task with due consideration to safety rules, accident prevention regulations and environmental protection stipulations;
- Apply professional knowledge, core skills & employability skills while performing the job of a Tool & Die Maker (**Press Tools and Jigs & Fixtures**) and machining work.
- Check the job/components as per drawing for functioning identify and rectify errors in job/components.
- Document the technical parameters related to the task undertaken.

2.2 CAREER PROGRESSION PATHWAYS:

- Can appear in 10+2 examination through National Institute of Open Schooling (NIOS) for acquiring higher secondary certificate and can go further for General/ Technical education.
- Can take admission in diploma course in notified branches of Engineering by lateral entry.
- Can join Apprenticeship programme in different types of industries leading to National Apprenticeship certificate (NAC).

• Can join Crafts Instructor Training Scheme (CITS) in the trade for becoming instructor in ITIs.

2.3 COURSE STRUCTURE:

Table below depicts the distribution of training hours across various course elements during a period of two years (04 semesters):

S No.	Course Element	Notional Training Hours
1	Professional Skill (Trade Practical)	2209
2	Professional Knowledge (Trade Theory)	510
3	Workshop Calculation & Science	170
4	Engineering Drawing	255
5	Employability Skills	110
6	Library & Extracurricular activities	146
7	Project work	240
8	Revision & Examination	520
	Total	4160

2.4 ASSESSMENT & CERTIFICATION:

The trainee will be tested for his skill, knowledge and attitude during the period of course and at the end of the training programme as notified by Govt. of India from time to time. The Employability Skills will be covered and tested in first two semesters only for two semesters course and tested at the end of 4th semester for 4 semester system for NCVT/German Exam.

- a) The Internal assessment during the period of training will be done by Formative Assessment Method by testing for assessment criteria listed against learning outcomes. The training institute have to maintain individual *trainee portfolio* as detailed in assessment guideline. The marks of internal assessment will be as per the template (Annexure II).
- b) The final assessment will be in the form of summative assessment method. The All India Trade Test for awarding NTC will be conducted by NCVT as per guideline of Govt. of India. The pattern and marking structure is being notified by Govt. of India from time to time. The learning outcome and assessment criteria will be basis for setting question papers for final assessment. The examiner during final examination will also check individual trainee's profile as

detailed in assessment guideline (German Marking System) before giving marks for practical examination.

2.4.1 PASS REGULATION:

The minimum pass percent for Practical is 60% & minimum pass percent for Theory subjects 40%. For the purposes of determining the overall result, 25% weightage is applied to the result of each semester examination.

2.4.2 ASSESSMENT GUIDELINE:

Appropriate arrangements should be made to ensure that there will be no artificial barriers to assessment. The nature of special needs should be taken into account while undertaking assessment. Due consideration to be given while assessing for teamwork, avoidance/reduction of scrap/wastage and disposal of scrap/wastage as per procedure, behavioral attitude, sensitive to environment and regularity in training. The sensitivity towards OSHE and self-learning attitude to be considered while assessing competency.

Assessment will be evidence based comprising the following:

- Job carried out in labs/workshop
- Record book/ daily diary
- Answer sheet assessment
- Viva-voce
- Progress chart
- Attendance and punctuality
- Assignment
- Project work

Evidence of internal assessment to be preserved until forthcoming semester examination for audit and verification by examination body. The following marking pattern to be adopted while assessing:

Performance Level	Evidence
(a) Weightage in the range of 60 -75% to be allo	tted during assessment
For performance in this grade, the candidate should produce work which demonstrates attainment of an acceptable standard of craftsmanship with occasional guidance, and due regard for safety procedures and practices.	 Demonstration of good skill in the use of hand tools, machine tools and workshop equipment. Below 70% tolerance dimension achieved while undertaking different work with those demanded by the component/job.

	 A fairly good level of neatness and consistency in the finish. Occasional support in completing the project/job.
(b)Weightage in the range of 75-90% to be allo	otted during assessment
For this grade, a candidate should produce work which demonstrates attainment of a reasonable standard of craftsmanship, with little guidance, and regard for safety procedures and practices.	 Good skill levels in the use of hand tools, machine tools and workshop equipment. 70-80% tolerance dimension achieved while undertaking different work with those demanded by the component/job. A good level of neatness and consistency in the finish. Little support in completing the project/job.
(c) Weightage in the range of above 90% to be	allotted during assessment
For performance in this grade, the candidate, with minimal or no support in organization and execution and with due regard for safety procedures and practices, has produced work which demonstrates attainment of a high standard of craftsmanship.	 High skill levels in the use of hand tools, machine tools and workshop equipment Above 80% tolerance dimension achieved while undertaking different work with those demanded by the component/job. A high level of neatness and consistency in the finish. Minimal or no support in completing the project.

3. JOB ROLE

Tool & Die Maker (Press Tools, Jigs & Fixtures):

Tool and Die Makers build, repair and modify custom made prototypes or special tools, Press Tools, Jigs, Fixtures and various types of mechanical devices. Press Tools are metal forms used for Sheet metal cutting and forming. Tool and Die Makers fabricate various parts, like pieces of a puzzle, which require perfect fitting. While this occupation is closely allied with the machinist trade and encompasses many of the same skills, Tool and Die Makers usually specialize in jobs spending more time in fitting and assembling precision components which are required for sheet metal cutting forms. A Tool and Die maker's work depends on precise measurements and accuracy, as such math skills are important. Also, they must be able to read and interpret information from design drawings and specifications to fabricate all types of Press Tools Jigs and Fixtures. Being mechanical minded is an additional skill.

Plan and organize assigned work; and detect and resolve issues during execution. Demonstrate possible solutions and agree tasks within the team. Communicate with required clarity and understand technical English, sensitive to environment, self-learning and productivity.

The trainee after completion of this course may be designated as Tool & Die Maker (Press Tools, Jigs & Fixtures) according to nature of work done.

5. NSQF LEVEL COMPLIANCE

NSQF level for **Tool & Die Maker (Press Tools, Jigs & Fixtures**) trade under CTS: **Level 5**

As per notification issued by Govt. of India dated 27.12.2013 on National Skill Qualification Framework total 10 (Ten) Levels are defined.

Each level of the NSQF is associated with a set of descriptors made up of five outcome statements, which describe in general terms, the minimum knowledge, skills and attributes that a learner needs to acquire in order to be certified for that level.

Each level of the NSQF is described by a statement of learning outcomes in five domains, known as level descriptors. These five domains are:

- a. Process
- b. Professional Knowledge
- c. Professional Skill
- d. Core Skill
- e. Responsibility

The broad learning outcome of **Tool & Die Maker** (**Press Tools, Jigs & Fixtures**) trade under CTS mostly matches with the Level descriptor at Level- 5.

The NSQF level-5 descriptor is given below:

Level	Process Required	Professional Knowledge	Professional Skill	Core Skill	Responsibility
Level 5	Job that requires well developed skill, with clear choice of procedures in familiar context.	Knowledge of facts, principles, processes and general concepts, in a field of work or study.	A range of cognitive and practical skills required to accomplish tasks and solve problem by selecting and applying basic methods, tools, materials and information.	Desired mathematical skill, understanding of social, political and some skill of collecting and organizing information, communication	Responsibility for own work and learning and some responsibility for other's works and learning.

6. LEARNING/ ASSESSMENT OUTCOME

Learning outcomes are a reflection of total competencies of a trainee and assessment will be carried out as per the assessment criteria.

6.1 GENERIC LEARNING OUTCOME

- 1. Recognize & comply with safe working practices, environment regulation and housekeeping.
- 2. Understand and explain different mathematical calculation & science in the field of study. [Different mathematical calculation & science -Work, Power & Energy, Algebra, Geometry & Mensuration, Trigonometry, Heat & Temperature, Levers & Simple machine, graph, Statistics, Centre of gravity, Power transmission, Pressure]
- 3. Interpret specifications, different engineering drawing and apply for different application in the field of work. [Different engineering drawing-Geometrical construction, Dimensioning, Layout, Method of representation, Symbol, scales, Different Projections, Machined components & different thread forms, Assembly drawing, Sectional views]
- 4. Select and ascertain measuring instrument and measure dimension of components and record data.
- 5. Explain the concept in productivity, quality tools, and labour welfare legislation and apply such in day-to-day work to improve productivity & quality.
- 6. Explain energy conservation, global warming and pollution and contribute in day-to-day work by optimally using available resources.
- 7. Explain personnel finance, entrepreneurship and manage/organize related task in day-to-day work for personal & societal growth.
- 8. Plan and organize the work related to the occupation.
- 9. Interpret specifications, different Dies & Moulds design drawing and apply for different application in the field of work. [Different Tool Design Drawing-Hand injection moulds, Mould base, two cavity injection mould in different constructional featured,]

6.2 SPECIFIC LEARNING OUTCOME

Semester – I

10. Plan and organize the work to make job as per specification applying different types of basic fitting operation and check for dimensional accuracy. [Basic fitting operation –

- Filing, Marking, Hack sawing, Drilling, Taping, chipping and Grinding etc. Accuracy: ± 0.1mm]
- 11. Make different fit of components for assembling as per required tolerance observing principle of interchangeability and check for functionality. [Different Fit –Open, Angular, & Square Fit; Required tolerance: ±0.05 mm, angular tolerance: 1 degree.]
- 12. Set different shaped jobs on different chuck and demonstrate conventional lathe machine operation observing standard operation practice. [Different chucks:3 jaws & 4 jaws, different shaped jobs: round, square, hexagonal]
- 13. Prepare different cutting tool to produce jobs to appropriate accuracy by performing different turning operations. Different cutting tool V tool, side cutting, parting, thread cutting (both LH & RH), Appropriate accuracy: ±0.06mm, Different turning operation Plain, facing, drilling, boring (counter & stepped), grooving, Parallel Turning, Step Turning, parting, chamfering, U-cut, Reaming, internal recess, knurling.
- 14. Set the different machining parameters to produce threaded components applying method/ technique and test for proper assembly of the components with an accuracy of ± 0.05 mm. [Different threads viz., metric/BSW/Square]

Semester – II

- 15. Set the different machining parameters and cutters to prepare job by performing different milling operation and indexing. [Different machining parameters feed, speed and depth of cut. Different milling operations plain, stepped, angular, dovetail, T-slot, contour, gear milling]
- 16. Produce components of high accuracy by surface grinding operation.[Accuracy of +/-0.02 mm]
- 17. Produce components of high accuracy by cylindrical grinding operations. [Accuracy of +/- 0.02mm.]
- 18. Sharpen different cutter or multipoint cutting tool. [Different cutters end mill cutter, side & face milling cutter, single angle cutter, Reamer]
- 19. Develop isometric drawing and solid modelling of mould using CAD & Pro-E.
- 20. Set the welding plant with appropriate parameters & perform different welding operations.[Appropriate parameter- electrode size, voltage, current, position, travel speed, torch angle.]

Semester – III

- 21. Manufacturing of drill Jig and produce component on drill machine by using Jigs and check for correctness. (Simple template & Plate Jig)
- 22. Manufacturing of fixtures (milling, turning and grinding) & test.
- 23. Set (both job and tool) CNC turning centre and produce components as per drawing by preparing part programme.

- 24. Set (both job and tool) CNC machining centre vertical and produce components as per drawing by preparing part programme.
- 25. Perform 2D & 3D machining with CAM software.
- 26. Produce components using Electric Discharge Machine (EDM) and Wire EDM as per drawing by preparing part programme with accuracy of ± 0.02 mm.
- 27. Manufacturing of blanking (simple) die set for square/ round/ rectangular/elliptical component and verify the component.
- 28. Construct a Piercing & Blanking tool & test and verify the component.

Semester – IV

- 29. Construct circuit of pneumatics and hydraulics observing standard operating procedure and safety aspect.
- 30. Demonstrate function of basic electrical circuit and sensors.
- 31. Construct a Compound Tool & test and verify the component.
- 32. Construct a Progressive tool & test and verify the component.
- 33. Plan and perform simple repair, overhauling of different machines and check for functionality. [Different Machines Drilling Machine, milling machine and Lathe]
- 34. Manufacture "V" bending tool & test.
- 35. Construct a draw tool (single stage) and test to verify the component.

7. LEARNING OUTCOME WITH ASSESSMENT CRITERIA

GENERIC LEARNING/ ASSESSABLE OUTCOME				
LEARNING/ ASSESSABLE OUTCOMES	ASSESSMENT CRITERIA			
Recognize & comply with safe working practices, environment regulation and housekeeping.	 Follow and maintain procedures to achieve a safe working environment in line with occupational health and safety regulations and requirements. Recognize and report all unsafe situations according to site policy. Identify and take necessary precautions on fire and safety hazards and report according to site policy and procedures. 			
	 1.4 Identify, handle and store/dispose of dangerous/unsalvageable goods and substances according to site policy and procedures following safety regulations and requirements. 1.5 Identify and observe site policies and procedures with 			
	regard to illness or accident. 1.6 Identify safety alarms accurately. 1.7 Report supervisor/ Competent authority in the event of accident or sickness of any staff and record accident details correctly according to site accident/injury procedures. 1.8 Identify and observe site evacuation procedures according			
	 to site policy. 1.9 Identify Personal Productive Equipment (PPE) and use the same as per related working environment. 1.10 Identify basic first aid and use them under different circumstances. 1.11 Identify different fire extinguisher and use the same as per 			
	requirement. 1.12 Identify environmental pollution & contribute to avoidance of same. 1.13 Take opportunities to use energy and materials in an environmentally friendly manner. 1.14 Avoid waste and dispose waste as per procedure. 1.15 Recognize different components of 5S and apply the same in the working environment.			
2. Understand, explain different mathematical calculation & science in the	2.1 Explain concept of basic science related to the field such as Material science, Mass, weight, density, speed, velocity, heat & temperature, force, motion, pressure, heat treatment,			

field of study incompassic electrical and application day-to-day work. [Distribution of the content of the cont	poply in a fiferent tion & 2.2 Measure dimensions as per drawing. 2.3 Use scale/ tapes to measure for fitting to specification. 2.4 Comply with given tolerance. 2.5 Prepare list of appropriate materials by interpreting detailed drawings and determine quantities of such materials. 2.6 Ensure dimensional accuracy of assembly by using different instruments/gauges.
drawing and apply different application field of work. [Dispension of the construction of the components of the componen	executing practical work. 3.2 Read and analyse the specification to ascertain the material requirement, tools, and machining/assembly/maintenance parameters. 3.3 Encounter drawings with missing/unspecified key information and make own calculations to fill in missing dimension/parameters to carry out the work. 3.4 Read and analyse the specification to ascertain the material requirement, tools, and machining/assembly/maintenance parameters. 3.3 Encounter drawings with missing/unspecified key information and make own calculations to fill in missing dimension/parameters to carry out the work.
Select and ascertain measuring instrument a measure dimension of components and record	and height gauge (as per tool list).
5. Explain the conce productivity, quality and labour welfare legi and apply such in daywork to improve productions.	tools, slation to-day 5.2 Understand the basic concept of labour welfare legislation and adhere to responsibilities and remain sensitive towards

	and quality	5.2 Vnovya hanafita ayanantaad undan yaniaya aata
	and quality.	5.3 Knows benefits guaranteed under various acts.
6.	Explain energy conservation, global warming, pollution and contribute in day-to-day work by optimally using available resources.	 6.1 Explain the concept of energy conservation, global warming, pollution and utilize the available resources optimally & remain sensitive to avoid environment pollution. 6.2 Dispose waste following standard procedure.
7	Explain personnel finance,	7.1 Explain personnel finance and entrepreneurship.
7.	entrepreneurship and manage/organize related task in day-to-day work for personal & societal growth.	 7.2 Explain role of various schemes and institutes for self-employment i.e. DIC, SIDA, SISI, NSIC, SIDO, Idea for financing/ non-financing support agencies to familiarize with the Policies/Programmes, procedure and the available scheme. 7.3 Prepare Project report to become an entrepreneur for submission to financial institutions.
		Land Co.
8.	Plan and organize the work related to the occupation.	 8.1 Use documents, drawings and recognize hazards in the work site. 8.2 Plan workplace/ assembly location with due consideration to operational stipulation. 8.3 Communicate effectively with others and plan project tasks. 8.4 Assign roles and responsibilities of the co-trainees for execution of the task effectively and monitor the same.

	field of work. [Different Tool Design Drawing-Hand	9.4 Explain the constructional features of an Injection Mould.
	injection moulds, Mould base, two cavity injection mould in different constructional feature]	9.5 Explain the method of design an Injection Mould.

SPECIFIC LEARNING/ ASSESSABLE OUTCOME			
Semester-I			
LEARNING/ ASSESSABLE OUTCOMES	ASSESSMENT CRITERIA		
10. Plan and organize the work to make job as per specification applying different types of basic fitting operation and check for dimensional accuracy. [Basic fitting operation – Filing, Marking, Hack sawing, Drilling, Taping, chipping and Grinding etc. Accuracy: ± 0.1mm]	10.1 Plan & Identify tools, instruments and equipments for marking and make this available for use in a timely manner. 10.2 Select raw material and visual inspect for defects. 10.3 Mark as per specification applying desired mathematical calculation and observing standard procedure. 10.4 Measure all dimensions in accordance with standard specifications and tolerances. 10.5 Identify Hand Tools for different fitting operations and make these available for use in a timely manner. 10.6 Prepare the job for Hack-sawing, chiselling, filing, drilling, tapping, grinding. 10.7 Perform basic fitting operations viz., Hack-sawing, filing, drilling, tapping and grinding to close tolerance as per specification to make the job. 10.8 Observe safety procedure during above operation as per standard norms and company guidelines. 10.9 Check for dimensional accuracy as per standard procedure. 10.10 Avoid waste, ascertain unused materials and components for disposal, store these in an environmentally appropriate manner and prepare for disposal.		
11. Make different fit of components for assembling	11.1 Plan and organize for fitting job.		
as per required tolerance observing principle of interchangeability and check for functionality. [Different Fit –Open, Angular, & Square Fit; Required tolerance: ±0.05 mm, angular tolerance: 1 degree]	 11.2 Select raw material, tools & equipments. 11.3 Perform the work pieces for fitting according to tolerances and interchangeability. 11.4 Check all dimensions and interchangeability in accordance with drawing and rectify, if required. 		
12. Set different shaped jobs on different chuck and demonstrate conventional lathe machine operation observing standard operation practice.	 12.1 Identify and acquaint with lathe machine operation with its components. 12.2 Identify different work holding devices and acquaint with functional application of each device. 12.3 Mount the appropriate work holding device and check for its functional usage to perform turning operations. 		

[Different chucks:3 jaws &	12.4 Set the job on chuck as per shape.		
4 jaws, different shaped jobs: round, square,	12.5 Set the lathe on appropriate speed & feed.		
hexagonal]	12.6 Operate the lathe to demonstrate lathe operation, observing		
	standard operating practice.		
	12.7 Observe safety procedure during above operation as per		
	standard norms and company guidelines.		
13. Prepare different cutting	13.1 Identify cutting tool materials used on lathe machine as per the		
tool to produce jobs to	specification and their application.		
appropriate accuracy by	13.2 Plan and Grind cutting tools.		
performing different turning	13.3 Measure the tool angles with gauge and Bevel protractor as per		
operations. [Different cutting tool – V tool, side	tool signature.		
cutting, parting, thread	13.4 Mount the job and set machine parameter.		
cutting (both LH & RH),	12.5 Dorform turning operations viz. facing Danallal Turning Stan		
Appropriate accuracy: -	13.5 Perform turning operations viz., facing, Parallel Turning, Step Turning, chamfering, grooving, U-cut, parting, drilling,		
±0.06mm, Different turning	boring(counter & stepped), Reaming, internal recess and		
operation – Plain turning,	knurling to make component as per specification.		
facing, drilling, boring	13.6 Check accuracy/ correctness of job using appropriate gauge		
(counter & stepped),	and measuring instruments for their functional requirement.		
grooving, Parallel Turning,	13.7 Avoid waste, ascertain unused materials and components for		
Step Turning, parting,	disposal, store these in an environmentally appropriate manner

	Semester-II		
15. Set the different machining	15. 1 Identify different work and tool holding devices and acquaint		
parameters and cutters to	with functional application of each device.		
prepare job by performing	15. 2 Mount the work and tool holding devices with required		
different milling operation	alignment and check for its functional usage to perform milling		
and indexing. [Different	operations.		
machining parameters –	15. 3 Observe safety procedure during mounting as per standard		
feed, speed and depth of	norms.		
cut. Different milling	15. 4 Solve problem by applying desired mathematical skill, basic		

operations – plain, stepped, angular, dovetail, T-slot, contour, gear milling]	methods, tools, materials and collect and organize information during setting.
16. Produce components of high accuracy by surface grinding operation. [accuracy of +/- 0.02 mm]	 16.1 Plan and select appropriate method to produce the work piece as per drawing. 16.2 Select appropriate tools, equipment and machine to produce the work piece as per drawing and make these available for use in a timely manner. 16.3 Grind the cutting tool following standard operating practice. 16.4 Set the job on grinding machine and grind the surfaces as per specification/drawing (parallel and stepped) following standard operating practice. 16.5 Check the dimension of parallel and stepped job by precession instrument (micrometer). 16.6 Observe safety precautions during operation during machining. 16.7 Check for desired performance.
	10.7 Check for desired performance.
17. Produce components of high accuracy by cylindrical grinding operations. [accuracy of +/- 0.02mm.]	 17.1 Set the machining parameter and produce the component applying technique/ machine. 17.2 External parallel grinding on cylindrical grinding. 17.3 Internal parallel grinding with cylindrical grinding machine using chuck/ collet. 17.4 Step grinding in cylindrical grinding machine (external). 17.5 Taper grinding on cylindrical grinding machine (external). 17.6 Check the accuracy of the component using instruments.
18. Sharpen different cutter or multipoint cutting tool. [Different cutters – end mill cutter, side & face milling cutter, single angle cutter, Reamer]	 18.1 Plan and set the cutter or multipoint cutting tool to the machine. 18.2 Set the appropriate machine parameter. 18.3 Sharpen the cutting tool observing standard operating procedure. 18.4 Observe safety/ precautions during the sharpening of cutting tool.
19. Develop isometric drawing and solid modelling of mould using CAD & Pro-E.	19.1 Demonstrate the working principle of the software.19.2 Demonstrate simple drawing in computer using Auto CAD.19.3 Demonstrate to draw an assembly drawing in computer.
	 19.4 Demonstrate to draw a simple hand injection mould. 19.5 Demonstrate the working principle of the software. 19.6 Demonstrate simple drawing in computer using Pro-E
	17.0 Demonstrate simple drawing in computer using 110-E

	19.7 Demonstrate to draw a simple hand injection mould.
appropriate parameters &	<u> </u>

	Semester-III				
21	Manufacture of drill Jig and produce component on drill	21. 1	Plan and select appropriate method to produce the drill jig as per drawing.		
	machine by using Jigs and check for correctness. (Simple template & Plate Jig)	21. 2	21. 2 Select appropriate tools, equipment and machine to produce the drill jig as per drawing and make these available for use in a timely manner.		
	r C	21. 3	Construct the drill jig following standard operating practice.		
		- 4.3.	Set the drill jig in appropriate machine and test observing standard operating practice.		
			Observe safety precautions during operation of machine.		
		21. 6	Check for desired performance and dimension of the		
			component.		
22	Manufacture of Finture	22.1	Diagond salest appropriate mathod to made dues the firsture as		
22	Manufacture of Fixture (milling, turning and	22.1	Plan and select appropriate method to produce the fixture as per drawing. Select appropriate tools, equipment and machine to produce		
	grinding) & test	22.2			
	gimaing) at test	22.2	the fixture as per drawing and make these available for use		
		in a timely manner.			
		22.3	Construct the fixture following standard operating practice.		
		22.4	Set the fixture in appropriate machine and test by observing standard operating practice.		
		22.5	Observe safety precautions during operation per during machine.		
		22.6	Check for desired performance and dimension of the component.		
23.	Set (both job and tool) CNC	23.1	Plan and prepare part programme as per drawing, simulate		
	turningcentre and produce		for its correctness with appropriate software.		
	components as per drawing by	23.2	Prepare tooling layout and select tools as required.		
	preparing part programme.	23.3	Demonstrate possible solution within the team.		
		23.4	Set selected tools on to the machine.		

	23.5 Test/Dry run the part programme on the machine.
	23.6 Set up the job and machine the component as per standard operating procedure involving parallel, step, taper, drilling, boring, radius, grooving and threading operations, etc.
	23.7 Check accuracy/ correctness of job using appropriate gauge and measuring instruments.
	23.8 Observe safety/ precaution during machining.
	23.9 Avoid wastage, ascertain unused materials and components for disposal, store these in an environmentally appropriate manner and prepare for disposal.
24. Set (both job and tool) CNC machining centre vertical and produce components as per	24. 1. Plan and prepare part programme as per drawing applying range of cognitive and practical skills, simulate for its correctness with simulation software.
drawing by preparing part programme.	24. 2. Demonstrate possible solutions within the team.
programme.	24. 3. Prepare tooling layout and select tools as required.24. 4. Set selected tools on to the machine.
	24. 5. Test/Dry run the part programme on the machine.
	24. 6. Set up the job and produce the component as per standard operating procedure involving face milling, contour milling with tool radius compensation, pocket milling, drilling, peck drilling, countersinking, tapping operations using canned cycle for hole operations.
	24. 7. Solve problems during operation by selecting and applying basic methods, tools, materials and information and using quality concept.
	24. 8. Check accuracy/ correctness of job using appropriate gauge and measuring instruments.
	24. 9. Observe safety/ precaution during machining.
25. Denfann 2D 9 2D	25. 1. Dungan contour and macEle are ablain.
25 Perform 2D & 3D machining with CAM software.	25. 1. Prepare contour and profile machining.25. 2. Perform 2D & 3D machining.
with CAIN SUITWAIC.	25. 2. Perform 2D & 3D machining.25. 3. Check the result for correctness.
	20. 5. Check the result for correctness.
26 Produce components using	26.1 Understand the parts and working principle of EDM.
Electric Discharge machine	26.2 Demonstrate simple EDM operations.
(EDM) and Wire EDM as per	26.3 Understand the parts and working principle of Wire EDM.
drawing by preparing part programme with accuracy of	26.4 Demonstrate simple Wire EDM operations.
± 0.02mm.	26.5 Check for desired functionality.
27. Manufacture of blanking (simple) die set for square/	27. 1 Plan and select appropriate method to produce the blanking tool as per drawing.
round/ rectangular/elliptical	27. 2 Select appropriate tools, equipment and machine to produce

component and verify the component.	the blanking tool as per drawing and make these available for use in a timely manner. 27. 3 Construct the blanking tool following standard operating practice. 27. 4 Set the blanking tool in appropriate press and test observing standard operating practice. 27. 5 Observe safety precautions during operation on the machine. 27. 6 Check for desired performance and dimension of the component.	
	Componenti	
28. Construct a Piercing & Blanking tool & test and	28. 1 Plan and select appropriate method to produce the piercing & blanking tool as per drawing.	
verify the component.	28. 2 Select appropriate tools, equipment and machine to produce the piercing & blanking tool as per drawing and make these available for use in a timely manner.	
	28. 3 Construct the piercing & blanking tool following standard operating practice.	
	28. 4 Set the piercing & blanking tool in appropriate machine and test observing standard operating practice.	
	28. 5 Observe safety precautions during operation on the machine.	
	28. 6 Check for desired performance and dimension of the component.	
Semester – IV		
29. Construct circuit of	29. 1. Select and ascertain tools for the job and make this	
pneumatics and hydraulics	available for use in a timely manner.	
observing standard operating	29. 2. Plan to construct pneumatics & hydraulics circuit as per	
procedure& safety aspect.	drawing and collecting necessary information.	
	29. 3. Demonstrate possible solutions and agree tasks within the	
	team for constructing circuit.	
	29. 4. Construct circuit of pneumatics and hydraulics observing	
	standard procedure. 29. 5. Comply with safety rules when performing the above	
	operations.	
	29. 6. Check different parameters and functionality of the system.	
30. Demonstrate function of basic	30.1 Demonstrate the measure of current, voltage and resistance	
electrical circuit and sensors.	using simple Ohm's law circuit.	
	30.2 Demonstrate soldering techniques.	
	30.3 Demonstrate step up and step-down transformers.	
	30.4 Demonstrate working of Motors and generators.	
	1305 Damonetrate the Robertour of Drovemetry Sengers and retire 1	
	30.5 Demonstrate the Behaviour of Proximity Sensors and ultrasonic sensors and logic operation of sensors.	
	 30.5 Demonstrate the Behaviour of Proximity Sensors and ultrasonic sensors and logic operation of sensors. 30.6 Limits and level control using sensors. 	

	30.7 Interfacing of sensors with electrical actuators.	
	30.7 Intertueing of sensors with electrical actuators.	
31. Construct a Compound Tool & test and verify the component.	 31.1 Plan and select appropriate method to produce the Compound Tool as per drawing. 31.2 Select appropriate tools, equipment and machine to produce the Compound Tool as per drawing and make these available for use in a timely manner. 31.3 Construct the Compound Tool following standard operating practice. 31.4 Demonstrate the assembly of a Compound Tool and set the Compound Tool in appropriate machine and test observing standard operating practice. 31.5 Observe safety precautions during operation per during machine. 31.6 Measure with instruments/gauges as per drawing after 	
	stamping.	
32. Construct a Progressive tool & test and verify the component.	 32. 1. Plan and select appropriate method to produce the Progressive tool as per drawing. 32. 2. Select appropriate tools, equipment and machine to produce the Progressive tool as per drawing and make these available for use in a timely manner. 32. 3. Construct the Progressive tool following standard operating practice. 32. 4. Demonstrate the assembly of a Progressive tool and set the Progressive tool in appropriate machine and test observing standard operating practice. 32. 5. Observe safety precautions during operation on all machines. 32. 6. Measure with instruments/gauges as per drawing after stamping. 	
33. Plan and perform simple repair, overhauling of different machines and check for functionality. [Different Machines – Drilling Machine, milling machine and Lathe]	 33.1 Ascertain and select tools and materials for the repair, overhauling and make this available for use in a timely manner. 33.2 Plan work in compliance with standard safety norms. 33.3 Demonstrate possible solutions and agree tasks within the team. 33.4 Select specific parts to be repaired and ascertain for appropriate material and estimated time. 33.5 Repair, overhaul and assemble the parts in the machine with the help of blue print. 33.6 Check for functionality of part and ascertain faults of the part/ machine in case of improper function. 33.7 Rectify faults of assembly. 	

34. Manufacture "V" bending tool & test.	34.1 Plan and select appropriate method to produce the "V" bending tool as per drawing.
	34.2 Select appropriate tools, equipment and machine to produce the draw "V" bending tool as per drawing and make these
	available for use in a timely manner.
	34.3 Construct the "V" bending tool following standard operating practice.
	34.4 Demonstrate the assembly of a "V" bending tool and set the "V" bending tool in appropriate machine and test observing standard operating practice.
	34.5 Observe safety precautions during operation of the machine.
	34.6 Measure with instruments/gauges as per design after "V" bending.
35. Construct a draw tool (single stage) and test to verify the	35.1 Plan and select appropriate method to produce the draw tool as per drawing.
component.	35.2 Select appropriate tools, equipment and machine to produce
	the draw tool as per drawing and make these available for use in a timely manner.
	35.3 Construct the draw tool following standard operating practice.
	Demonstrate the assembly of a draw tool and set the draw tool in appropriate machine and test by observing standard operating practice.
	35.5 Observe safety precautions during operation on the machine.
	35.6 Measure with instruments/gauges as per design after drawing.

SYLLABUS FOR TOOLS & DIE MAKER (Dies & Moulds) TRADE

	First Semester - Six Months					
Week No.	Ref. Learning Outcome	Professional Skills With Indicative hrs.	Professional Knowledge (Trade Theory)			
1-2	Recognize & comply with safe working practices, environment regulation and housekeeping.	 Introduction of trade skill and work application. (02 hrs) Safety attitude development of the trainee by educating them to use Personal Protective Equipment (PPE). (05 hrs) First Aid Method and basic training. (02 hrs) Safe disposal of waste materials like cotton waste, metal chips/burrs etc. (02 hrs) Hazard identification and avoidance. (02 hrs) Identification of safety signs for Danger, Warning, caution & personal safety message. (01 hrs) Preventive measures for electrical accidents & steps to be taken in such accidents. (02 hrs) Use of Fire extinguishers. (07 hrs) Practice and understand precautions to be followed while working in fitting jobs. (02 hrs) Importance of trade training, List of tools & Machinery used in the trade. (01 hrs) Safe use of tools and equipments used in the trade. (01 hrs) Knowing games and memory training. (15 hrs) Motivational talk by experts. (05 hrs) Straining. (03 hrs) 	All necessary guidance to be provided to the newcomers to become familiar with the working of Industrial Training Institute system including store's procedures. Safe working practices. Soft Skills, its importance and Job area after completion of training. Importance of safety and general precautions observed in the industry/shop floor. Introduction of First aid. Operation of electrical mains and electrical safety. Introduction of PPEs. Response to emergencies e.g. power failure, fire, and system failure. Importance of housekeeping & good shop floor practices. Introduction to 5S concept & its application. Occupational Safety & Health: Health, Safety and Environment guidelines, legislations & regulations as applicable.			
3	Plan and organize	15. Identification of tools	Bench work - Metal working hand			
	the work to make	&equipments as per desired	tools and devices –Work bench – vices			
	job as per	specifications for filing and	- files - hacksaw - hammer - chisels -			
	specification	marking, visual inspection of raw	spanners – screw drivers – scrapers.			

	applying different types of basic fitting operation and check for dimensional accuracy. [Basic fitting operation – Filing, Marking, Hack sawing, Drilling, Taping, chipping and	material for rusting, scaling, corrosion etc. (03 hrs) 16. Familiarisation of bench vice. (01 hrs) 17. Filing- File top of the "U" channel, check and measure with steel rule. (10 hrs) 18. Mark with scriber and steel rule. (01 hr) 19. Measuring practice with steel rule, outside & inside callipers. (10 hrs)	Linear measurements- its units, steel rule dividers, callipers – types and uses, Punch – types and uses. Description, use and care of marking table.
	Grinding etc. Accuracy: ± 0.1mm]		
4-5	-do-	 20. File, mark straight and parallel lines with odd leg callipers/scriber and steel rule as per drawing. (05 hrs) 21. Dot punching and letter and number punching. (05 hrs) 22. File "U" channel to size using straight edge, try-square and vernier calliper for measuring and checking- Accuracy +/-0.1mm. (25 hrs) 23. Sawing different types of metals of different sections- round piece and Angle Iron. (10 hrs) 24. Prepare mushroom head on round bar by hammering. (05 hrs) 	Vernier calliper – its parts, principles, reading, uses and care. Outside micrometer – its parts, principles, reading, uses and care, vernier height gauge. Marking tools – scriber, Dividers, Dot punch, Centre punch. Marking out – Coordinates system, Rectangular – Polar – Rules for marking. Bevel protractor, combination set- their components, uses and cares. Pedestal grinder, star wheel dresser, safety precautions, care and maintenance.
6	-do-	 25. Make "S" bend by Hammering on flat piece. (04 hrs) 26. Grinding, centre punch, dot punch, flat chisel and scriber. (04 hrs) 27. Drill gauge filing (06 hrs) 28. Drill grinding practice. (06 hrs) 29. Drill Centring Practice. (05 hrs) 	Marking media, marking blue, Prussian blue, red lead, chalk and their special application, description. Surface plate and auxiliary marking equipment, 'V' block, angle plates, parallel block, description, types, uses, accuracy, care and maintenance. Bevel protractor, combination set- their components, uses and cares. Drill, Tap, Die-types & application. Determination of tap drill size. Reamer- material, types (Hand and machine reamer), parts and their uses,

			determining hole size for reaming,
			Reaming procedure.
			Drilling machines-types and their application, construction of Pillar & Radial drilling machine. Countersunk, counter bore and spot facing-tools and
			nomenclature. Cutting Speed, feed, depth of cut and
			Drilling time calculations.
7	-do-	30. Drill Plate filing to an accuracy of ±0.05mm. (25 hrs)	Dial test indicator-its parts, types, construction and uses.
8-9	-do-	 31. Marking for centre punching, drilling, reaming, tapping, counter boring, counter sinking. (04 hrs) 32. Centre punching, drilling, reaming, tapping, counter boring, counter sinking on drill plate. (08 hrs) 33. Die pass on standard material (M8). (02 hrs) 34. Chipping flat surfaces along a marked line on pre-machined piece. (08 hrs) 35. Slot, straight and angular chipping. (08 hrs) 36. Cutting tool filing and grinding on standard material. (20 hrs) 	Interchangeability: Necessity in Engineering. field, Limit- Definition, types, terminology of limits and fits-basic size, actual size, deviation, high and low limit, zero line, tolerance zone, allowances. Different standard systems of fits and limits. Geometrical tolerance. British standard system, BIS system. Study of tools used in chipping and scraping.
10	Make different fit of components for assembling as per required tolerance observing principle of interchangeability and check for functionality. [Different Fit – Open, Angular, & Square Fit; Required tolerance: ±0.05 mm, angular tolerance: 1 degree.]	37. Make Male & Female 'Open' fitting with accuracy ±0.05 mm. (25 hrs)	Introduction about metals, difference between Metal and Non Metal, properties of metal, Classification of metals and its applications, pig – iron, cast iron, wrought iron, steel-plain carbon steel(Low carbon steel, medium and high carbon steels, high speed steel, stainless steel, carbides, etc.)
11-12	-do-	 38. Make male & female for square fit with accuracy ± 0.05 mm. (30 hrs) 39. Scrapping exercise on 3 pieces using two female piece of square 	Heat treatment of metals, process- such as annealing, nit riding, hardening, tempering, case hardening, carburizing, cyaniding, flame hardening,

		fit.(20 hrs)	Induction hardening, purposes and its
		` ,	effects on the properties of steel.
13-14	-do-	40. Angular fitting with male & female. (40 hrs) 41. Assembly fit with male & female by dowelling and screwing. (10 hrs)	Getting to know the lathe with its main components, lever positions and various lubrication points as well. Definition of machine & machine tool and its classification.
15-16	Set different shaped jobs on different chuck and demonstrate conventional lathe machine operation observing standard operation practice. [Different chucks:3 jaws & 4 jaws, different shaped jobs:round, square, hexagonal]		Introduction to lathe- its types. Centre lathe construction, detail function of parts, specification. Safety points to be observed while working on a lathe.
17-18	Prepare different cutting tool to produce jobs to appropriate accuracy by performing different turning operations. [Different turning tool – V tool, side cutting, parting, thread cutting (both LH & RH), Appropriate accuracy: ±0.06mm, Different turning operation – Plain, facing, drilling, boring (counter & stepped), grooving, Parallel Turning, Step Turning, parting, chamfering, U -cut, Reaming, internal recess, knurling.]	parting tool, Round nose tool. (05 hrs) 46. Checking of angles with angle gauge / bevel protractor. (02 hrs) 47. Grinding of "V" tools for threading of Metric/ British threads. (08 hrs) 48. Plain turning (holding in 4 – jaw chuck), step turning and forming shoulder, chamfering in between	Different types of Lathe operations - facing, turning, parting-off, grooving, chamfering, boring etc. Lathe cutting tool-different types, shapes and different angles (clearance, rake etc.), specification of lathe tools. Types of chips, chip breaker. Tool life, factors affecting tool life.
19	-do-	50. Bush turning, drilling and boring/reaming. (15 hrs)	Driving mechanism, speed and feed mechanism of Lathe.

		51. Spur gear blank turning, drilling and boring. (10 hrs)	Slotter— Classification, principle, construction, Safety precaution. Comparative study with a shaping machine. Introduction and their indexing process on a Slotter by its Rotary table graduations. Driving mechanisms, quick return motion and speed ratio. Safety points to be observed while working on a Slotter.
20	-do-	 52. Turning and die passing in a standard material. (08 hrs) 53. Pin punch turning and knurling (10 hrs) 54. Using 4 – jaw chuck; face both side of a plate thickness as per drawing. (07 hrs) 	Concept of Orthogonal and Oblique Cutting. Chucks & different types of job holding devices on lathe and advantages of each type. Mounting and dismounting of chucks. Knurling-types, grade & its necessity. Vernier Bevel Protractor – parts, reading and uses.
21	-do-	55. Eccentric turning male and female work pieces and assembly. (25 hrs)	Various material for single point cutting tools, tip tools- their brazing and grinding process. Tool angles and their effects on cutting various material.
22	Set the different machining parameters to produce threaded components applying method/technique and test for proper assembly of the components with an accuracy of ± 0.05 mm. [Different threads viz., metric/ BSW/Square]	 56. External thread cutting on step turned work piece. (Metric, BSW & Square Thread) (15 hrs) 57. Turn job for Internal thread and cut internal thread (10 hrs). 	Calculations of taper turning by off- setting tail stock. Sine Bar – description & uses Slip gauge –description and uses.
23-25	Revision		
26	Examination		

Note:

More emphasis to be given on video/real-life pictures during theoretical classes. Some real-life pictures/videos of production of different components.

	SYLLABUS FOR TOOLS & DIE MAKER (Dies & Moulds) TRADE			
	Second Semester - Six Months			
Week No.	Learning Outcome	Professional Skills With Indicative Hours	Professional Knowledge (Trade Theory)	
27	Set the different machining parameters and cutters to prepare job by performing different milling operation and indexing. [Different machining parameters – feed, speed and depth of cut. Different milling operations – plain, stepped, angular, dovetail, T-slot, contour, gear milling]	 58. Identification of milling machine. (02 hrs) 59. Demonstrate working principle of Milling Machine. (04 hrs) 60. Set vice & job on the table of Milling Machine. (05 hrs) 61. Set arbor on the spindle of milling machine. (08 hrs) 62. Set the cutter on arbor. (04 hrs) 63. Safety points to be observed while working on a milling machine. (02 hrs) 	Milling Machine: importance, types, construction and specification. Driving and feed mechanism of Milling Machine Nomenclature of milling cutters, different milling cutter angles, Milling cutter materials.	
28	-do-	 64. Demonstrate Up Milling and Down Milling Process. (05 hrs) 65. Perform sequence of milling for six faces of a solid block 2 numbers. (13 hrs) 66. Check the accuracy with the help of tri-square and vernier height gauge. (02 hrs) 67. Perform Step milling using side and face cutter checking with depth micrometer. (05 hrs) 	Job holding devices-vice, clamps, V-block, parallel block etc. Slotting tools-types, tool angles. Comparison of tool angle. Milling cutter holding devices, work holding devices, milling process – Up milling and Down milling.	
29	-do-	 68. Milling blank piece (plain milling). (10 hrs) 69. Slot milling with side and face cutter (08 hrs) and Slot cutting by slitting saw. (07 hrs) 	Calculation of cutting speed, feed, machining time for milling machine. Milling machine operations. Milling machine attachments – vertical milling attachment, universal milling attachment, circular milling attachment, dividing head attachment, etc.	
30	-do-	70. 90 ⁰ angular milling with equal angle cutter. (08 hrs)	Use of tool with holder for internal operations. Precautions to be observed	

31	-do-	 71. Dove tail milling. (09 hrs) 72. Tee slot milling. (08 hrs) 73. Step milling by straddle milling process. (09 hrs) 74. Concave and Convex milling. (16 hrs) 	of each.
32	-do-	75. Spur gear milling. (15 hrs) 76. Key way slotting. (10 hrs)	Dividing head – Introduction, construction, types. Simple and universal dividing head. Indexing methods – direct indexing, simple indexing, angular indexing, differential indexing and its calculations.
33	Produce components of high accuracy by surface grinding operation. [Accuracy of +/-0.02 mm]	 77. Identification of different types of grinding machine. (02 hrs) 78. Wheel balancing & truing. (06 hrs) 79. Dressing of grinding wheel. (02 hrs) 80. Grinding of block (six sides) in surface grinding machine with an accuracy of ±0.01 mm. (15 hrs) 	Grinding machine introduction, types, Surface & Cylindrical grinding Machine- their parts, functions, specification, and uses. Safety points to be observed while working on a Grinding machine.
34	-do-	 81. Grinding of step block in surface grinding machine with an accuracy of ± 0.01 mm. (15 hrs) 82. Grinding of slot block in surface grinding machine with an accuracy of ± 0.01 mm. (10 hrs) 	Grinding wheel shapes and sizes. Standard marking system. Selection of grinding wheel.
35-36	-do-	 83. Set and perform angular grinding using sign plate to stranded angle. (20 hrs) 84. Make slide fit (male/female) (12 hrs) 85. Perform form grinding. (08 hrs) 86. Taper angle fitting. (10 hrs) 	Specification and Identification of grinding wheels.
37	Produce components of high accuracy by cylindrical grinding operations. [Accuracy of +/-0.02mm.]	Cylindrical grinding: 87. External Parallel grinding (Both holding in chuck/ collet and in between centres. (17 hrs) 88. Plunge grinding. (08hrs)	Procedure for mounting of grinding wheels, balancing of grinding wheels. Dressing, types of dresser. Glazing and Loading of wheels – its Causes and remedies. Roughness values and their symbols. Explain the importance and necessity of quality.

38	-do-	Cylindrical grinding:	-do-
		89. Internal Parallel grinding (Both	
		holding in chuck/collet and in between centres). (25 hrs)	
39	-do-	90. Grinding of step in Cylindrical	Selection procedure of grinding wheels.
		grinding machine with an accuracy of ±0.01 mm (15 hrs)	Abrasives - its types, Bond, Grade, Grit, structure.
		91. Grinding of external taper in	Standard marking system of Grinding
		Cylindrical grinding machine with	Wheel.
40	Sharpen different	an accuracy of \pm 0.01 mm. (10 hrs) 92. Demonstrate and practice of	Tool & cutter grinder-construction, use
	cutter or multipoint	grinding of end mill cutter of	and specification.
	cutting tool. [Different cutters –	different sizes. (25 hrs)	
	end mill cutter, side	-	
	& face milling		
	cutter, single angle cutter, Reamer]		
41-42	Develop isometric	93. Prepare simple mould design	AutoCAD: Introduction to AutoCAD,
	drawing and solid	drawings with basics of AutoCAD viz., Basic and advanced 2D	creating first drawing, learning the tools trade, organizing the work, drawing the
	modelling of mould using CAD & Pro-	drafting, Draw commands,	first mould.
	E.	Constraints, Modify commands,	
		Layers, Line types block, Texts, Attribute, Table, Dimensioning,	56
		Isometric, Solid modelling, View	_ 2
43-44	-do-	port. (50 hrs) 94. Prepare solid modelling of simple	Pro-E: Familiarization of interface/
43-44	-40-	mould with Pro-E [Sketch, Part	Windows, Sketching, basic modeling,
		(solid, surface, free style, flexible	advanced modeling, assembling,
		modelling, sheet metal.), Assembly, Creo direct, Creo	drawing, surface modeling, manufacturing – mould design
		simulate]. (25 hrs)	awareness.
		95. Creating (NC assembly and mould	
		cavity) drawing. (10 hrs) 96. Part drawing of the universal	
		coupling assembled all the parts	
		and solid modelling and denoted by coloured combination. (15hrs)	
45-46	Set the welding	97. Introduction to gas welding/ arc	Explanation of gas welding, arc welding
	plant with	welding/ MIG welding equipment,	and MIG welding techniques description
	appropriate	simple welding and brazing practice. (25 hrs)	of welding equipments and welding joints.
	parameters & perform different	98. Practice on die welding, welding	Knowledge about flux, filler rod
	perform different welding operations.	on hardened die block as well as	material. Die welding techniques.
	wording operations.	on die casting dies. (25 hrs)	Die weiding techniques.

47-48	Appropriate parameter- plectrode size, poltage, current, position, travel peed, torch angle.] n-plant training/ Project work a) Tool Maker's Clamp b) Grinding Wheel Dressing Fixture
49-51	Revision
52	Examination

Note:

- 1. Some of the sample project works (indicative only) are given against each semester.
- 2. Instructor may design their own project and also inputs from local industry may be taken for designing such new projects.
- 3. The project should broadly cover maximum skills in the particular trade and must involve some problem solving skill. Emphasis should be on Teamwork: Knowing the power of synergy/collaboration, work to be assigned in a group (Group of at least 4 trainees). The group should demonstrate Planning, Execution, Contribution and application of Learning. They need to submit Project report.
- 4. If the instructor feels that for execution of specific project, more time is required than he may plan accordingly to produce components/ sub-assemblies in appropriate time i.e., may be in the previous semester or during execution of normal trade practical.
- 5. More emphasis to be given on video/real-life pictures during theoretical classes.

SYLLABUS -TOOL & DIE MAKER

(Press Tools, Jigs & Fixtures)

Third Semester- 06 months

	Timu Semester- of months				
Week	Ref. Learning	Professional Skills	Professional Knowledge		
No.	Outcome	With Indicative Hours	(Trade Theory)		
No. 53-55	Manufacturing of drill Jig and produce component on drill machine by using Jigs and check for correctness. (Simple template & Plate Jig)	99. Make simple drilling jig (20 hrs) 100. Use simple Jigs for drilling, reaming and tapping. (4 hrs) 101. Manufacturing of indexing jigs. (20 hrs) 102. Manufacturing of ring jigs, box jigs, and diameter jigs. (20 hrs) 103. Manufacturing of channel jig, sandwich jig, tumble jig. (11 hrs)	Introduction to tooling. Introduction to Jigs and Fixtures, Plane of movements, possible movements of work piece, location of work piece, types of Jigs, Types of Fixtures, Jigs and machine relations. Method of restricting the possible movement (principle, 3-2-1 pin method). Locating method. Introduction of locating devices, its material, types of locators, locator for flat, surface, internal diameter and external profit. Clamping and work holding devices: Ejectors, clamping devices, types of clamps for jig and fixture. Material for ejector and clamps. Drill Bushes Type of drill jigs. Type of fixture. Fixture and machine relations, cutting force on jigs and fixtures, elements of jigs and fixtures, design of jigs and fixtures, failure of jigs and fixtures.		
56-58	Manufacturing of fixtures (milling, turning and grinding).	 104. Manufacturing of milling fixture and application. (25 hrs) 105. Manufacturing of turning fixture and application. (25 hrs) 106. Manufacturing of grinding fixture and application. (25 hrs) 	Types of press Tools/ Operations: Guide Plate tool, piercing tool, blanking tool, progressive tool, compound tool, cut off tool, parting tool, etc. (03 hrs)		
59-61	Set (both job and tool) CNC lathe and produce components as per drawing by preparing part programme.	 107. Study of CNC lathe, key board and specifications. (05 hrs) 108. Machine starting & operating in Reference Point, JOG, and Incremental Modes. (15 hrs) 109. Co-ordinate system points, assignments and simulations 	Safety Precautions: Safe handling of tools, equipment & CNC machines, CNC turning with FANUC CNC CONTROL-(Fanuc-Oi-T latest) CNC Machine & Control specifications. CNC system organization Fanuc-Oi-T. Co-ordinate systems and Points. CNC lathe, Types,		

62-64	Set (both job and tool) CNC	Absolute and incremental programming assignments and simulations. (20 hrs) 110. Co-ordinate points, assignments and simulations. Identification of machine over travel limits and emergency stops. (10 hrs) 111. Work and tool setting. Automatic Mode operation: facing, profile turning, drilling, tapping, reaming, thread cutting etc. (25 hrs) 112. Study of CNC Machining centre, key board and	Safety Precautions: Safe handling of tools, equipment & CNC machines, CNC
	machining centre and produce components as per drawing by	specifications. (05 hrs) 113. Machine starting & operating in Reference Point, JOG, and Incremental Modes. (10 hrs) 114. Co-ordinate system points, assignments and simulations Absolute and incremental programming assignments and simulations. (15 hrs) 115. Polar co-ordinate points, assignments and simulations. Identification of machine over travel limits and emergency stops. (20 hrs) 116. Work and tool setting. Automatic Mode operation: Face Milling, profile milling, drilling, tapping, reaming etc. (25 hrs)	Mill with FANUC CNC CONTROL- (Fanuc-0i-M latest) CNC Machine &Control specifications. CNC system organization Fanuc-0i-M. Co-ordinate systems and Points. CNC Machines Milling, Types, Machine axes.
65-66	Perform 2D & 3D machining with CAM software	117. 2D and 3D machining with CAM software. (50 hrs)	Preparing for contour and profile machining.
67-68	Produce components using Electric Discharge machine (EDM) and Wire EDM as per drawing by preparing part programme with accuracy of ± 0.02mm.	 118. Identify different parts of EDM/wire cut machining centres and read specification. (08 hrs) 119. Perform machine starting and operating in reference point. (08 hrs) 120. Identification of machine over travel limits on emergency. (10 hrs) 121. Part program preparation entry, 	Describe machine tool elements, feed drives. Advantage and disadvantage of wire cut machine.

		editing, and simulation on wire cut machine software of wire cut	
		machine. (20 hrs)	
		122. Carry out tool path tool path simulation. (4 hrs)	
69-71	Manufacturing of blanking (simple) die set for square/round/rectangular/elliptical component and verify the component. (individual)	123. Manufacturing die as per drawing dimension and maintain die clearance and die land, provide angular clearance after die land. (25 hrs) 124. Manufacturing of Punch as per drawing dimension. (15 hrs) 125. Manufacturing stripper plate bottom plate (die press) tap plate, punch holder, gauges and shank, thrust plate, stop pin. (35 hrs) (May use the plates from turning, milling and grinding exercises)	Cutting clearance: Importance of cutting clearance, typical appearance characteristics, determination of punch and die dimensions. Land and angular clearance: Importance if angular clearance, methods of providing angular clearance. Basic design of guide plate tool. Alignment technique between Punch and Die while assembly. Guide Plate Tool: Construction, function of elements, related design. Cutting force: calculation of cutting force for press tool operations, selection of suitable press, method of reducing cutting force.
		शल भारत - कुश	Stock material: Relation of piece part and stock strip, stock material used in press work, differentiate stock strip and unit stock. Strip layout: Importance of strip layout, different types of strip layout, economic layout. Punch: Cutting punches, non-cutting punches, hybrid punches, types of punches, selection of punches.
			Buckling of punches: Buckling theorem, problems, types of loading coming on a punch, determining of the size of the punch. Die Block: Types of dies, requirement of die block.
72-73	Construct a Piercing & Blanking tool &	126. Construct a piercing and blanking tool as per the design	Stoppers: Function, basic stop principles, construction of different types of
	test and verify the	given. (all components of tool to	stoppers.
	component	be the exercises of other	Strippers: Function, types of stripper,
	(individual)	machines) (50 hrs)	constructional details.

74-75		Gauge:Function of gauge, types of gauge. Pilots: Purpose of pilot, types of pilot, function of pilot, different methods of piloting. Side cutter Shank and positioning Die Set: Different types of die set, die set components, die set material, types of die set, shut height. Presses: Classification of press, types of a press, parts of a press, press selection, strip feeding arrangement, die cushion. Blanking Tool: Construction, function of elements, related design. Piercing Tool: Construction, function of elements, related design. Ejector and shedders Progressive tool: Construction, function of elements, related design of progressive too.
	Assembly of piercing and blanking tool and trial.	
76-77	Revision	
78	Examination	

Note:

- 1. Some of the sample project works (indicative only) are given against each semester.
- 2. Instructor may design their own project and also inputs from local industry may be taken for designing such new projects.
- 3. The project should broadly cover maximum skills in the particular trade and must involve some problem solving skill. Emphasis should be on Teamwork: Knowing the power of synergy/collaboration, work to be assigned in a group (Group of at least 4 trainees). The group should demonstrate Planning, Execution, Contribution and application of Learning. They need to submit Project report.
- 4. If the instructor feels that for execution of specific project more time is required than he may plan accordingly to produce components/ sub-assemblies in appropriate time i.e., may be in the previous semester or during execution of normal trade practical.
- 5. More emphasis to be given on video/real-life pictures during theoretical classes.

SYLLABUS- TOOL & DIE MAKER

(Press Tools, Jigs & Fixtures)

Four	·th	SAI	nac	tor_(N 6	mo	nthe
rom		-7EI	1162	I (- II - I	I JUD	1110	

	Fourth Semester-06 months			
Week No.	Learning Outcome	Professional Skills With Indicative hrs.	Professional Knowledge (Trade Theory)	
79-80	Construct circuit of pneumatics and hydraulics observing standard operating procedure& safety aspect.	127. Identification and familiarisation of various types of hydraulic & pneumatic elements such as cylinder, valves, actuators and filters. (10 hrs) 128. Study of simple hydraulic & pneumatic circuit. (40 hrs)	Basic principles of hydraulics/ pneumatics system, advantages and disadvantages of hydraulics and pneumatics systems, theory of Pascal's law, Brahma's press, Pressure and flow, types of valves used in hydraulics and pneumatics system.	
81-82	Demonstrate function of basic electrical circuit and sensors.	 129. Measure Current, Voltage and Resistance using simple Ohm's Law Circuit and familiarizing multi-meter. (05 hrs) 130. Soldering Techniques. (05 hrs) 131. Step up and step down transformers. (05 hrs) 132. Working with Solenoids and Relays. (05 hrs) 133. Working of Motor & generators. (05hrs) 134. Behaviour of Proximity Sensors. (05 hrs) 135. Behaviour of ultrasonic sensors. (05 hrs) 136. Logical operation of sensors. (05 hrs) 137. Limit & Level Control using Sensors. (05 hrs) 138. Interfacing of Sensors with Electrical Actuators. (05 hrs) 	Study of basic Electricals- Voltage – Current etc. Working of Solenoids, Inductors, Motors, Generator based On Electromagnetic Induction Principle Switches, Fuse and Circuit Breakers Introduction to SensorsFundamental of Sensor Proximity Sensors Classification and Operation-Proximity Sensor-Types Of Proximity Sensor And Their Working-Industrial Application Sensors for Distance and Displacement - LVDT-Linear Potentiometer -Ultrasonic and Optical Sensors-Industrial Application	
83-85	Construct a Compound Tool & test and verify the component. (Group of 5 trainees)	139. Construct a compound tool as per the drawing using various tool room machines and equipments. (75 hrs)	Compound Tool: Introduction, description of different parts and their function, calculation of clearance, constructionShaving tool.	
86-91	Construct a Progressive tool & test and verify the component. (Group of 5	140. Construct a progressive tool as per the drawing (145 hrs)141. Prepare different types of documentation as per industrial need by different methods of	Bending tool: Principles of bending, plastic deformation due to bending, bending elements, blank length, bending stress, bending force, spring back, stripping "U" bend, effect of grain	

	trainees)	recording information for the project. (05 hrs)	direction.
92-93	Plan and perform simple repair, overhauling of different machines and check for functionality. [Different Machines – Drill Machine, milling machine and Lathe]	142. Perform Periodic Lubrication system on Machines. (10 hrs) 143. Perform simple repair work. (15 hrs) 144. Perform the routine maintenance with check list. (05 hrs) 145. Inspection of Machine tools such as alignment, levelling etc. (10 hrs) 146. Accuracy testing of machine tools such as geometrical parameters. (10 hrs)	Lubricating system-types and importance Maintenance: Definition, Types and its necessity. System of symbol and colour coding. Possible causes for failure and remedies.
94-96	Manufacture "V" bending tool & test.(5 trainees in a group)	147. Construct a "V" bending tool as per the drawing (75 hrs)	Forming tool: Construction, function of elements, related design Drawing Tool: Description of drawing and deep drawing, deep drawing cylindrical cup, force acting on a component while drawing, metal flow during drawing, wrinkling and puckering, blank development, drawing force, press capacity, blank holding force, die and punch radius, draw beeds, air vents, lubrication, number of draws drawing flanged components, metal flow in rectangular shells, fault occurring during deep drawing.
97-99	Construct a draw tool (single stage) and test to verify the component.(5 trainees in a group)	148. Construct a draw tool (single stage) as per the drawing given using various machine tools and equipments. (75 hrs)	Factors effecting tool life Fine Blanking Tool
100-		bly of drawing tool and test/ Draw die)	
101	(Component cup shape)/ Compound tool		
102- 103	Revision		
104		Examination	

NOTE:

- 1. Some of the sample project works (indicative only) are given against each semester.
- 2. Instructor may design their own project and also inputs from local industry may be taken for designing such new projects.

- 3. The project should broadly covers maximum skills in the particular trade and must involve some problem solving skill. The group should demonstrate Planning, Execution, Contribution and application of Learning. They need to submit Project report.
- 4. If the instructor feels that for execution of specific project, more time is required than he may plan accordingly to produce components/ sub-assemblies in appropriate time i.e. may be in the previous semester or during execution of normal trade practical.
- 5. More emphasis to be given on video/real-life pictures during theoretical classes.

9. SYLLABUS - CORE SKILLS

9.1 WORKSHOP CALCULATION SCIENCE & ENGINEERING DRAWING

	First Semester Duration: Six Month			
S No.	Workshop Calculation and Science	Engineering Drawing		
1.	<u>Unit</u> : Systems of unit- FPS, CGS, MKS/SI unit, unit of length, Mass and time, Conversion of units	 Engineering Drawing: Introduction and its importance Relationship to other technical drawing types Conventions Viewing of engineering drawing sheets. Method of Folding of printed Drawing Sheet as per BIS SP:46-2003 		
2.	Fractions: Fractions, Decimal fraction, L.C.M., H.C.F., Multiplication and Division of Fractions and Decimals, conversion of Fraction to Decimal and vice versa. Simple problems using Scientific Calculator.	Drawing Instruments: their Standard and uses - Drawing board, T-Square, Drafter (Drafting M/c), Set Squares, Protractor, Drawing Instrument Box (Compass, Dividers, Scale, Diagonal Scales etc.), Pencils of different Grades, Drawing pins/ Clips.		
3.	Square Root: Square and Square Root, method of finding out square roots, Simple problem using calculator.	 Lines: Definition, types and applications in Drawing as per BIS SP:46-2003 Classification of lines (Hidden, centre, construction, Extension, Dimension, Section) Drawing lines of given length (Straight, curved) Drawing of parallel lines, perpendicular line Methods of Division of line segment 		
4.	Ratio & Proportion: Simple calculation on related problems.	Lettering and Numbering as per BIS SP46-2003: Single Stroke inclined Upper case and Lower case numbers. Practice of lettering and numbering		
5.	Percentage: Introduction, Simple calculation. Changing percentage to decimal and fraction and vice-versa.	Sizes and Layout of Drawing Sheets - Basic principle of Sheet Size - Designation of sizes - Selection of sizes - Title Block, its position and content - Borders and Frames (Orientation marks and		

		graduations)
		- Grid Reference
		- Item Reference on Drawing Sheet (Item List)
6.	Material Science: properties-Physical & Mechanical, Types –Ferrous & Non-	Drawing of Geometrical Figures: Definition, nomenclature and practice of
	Ferrous, difference between Ferrous and Non-Ferrous metals, introduction of Iron, Cast Iron, Wrought Iron, Steel, difference between Iron and Steel, Alloy steel, carbon steel, stainless steel, Non-Ferrous metals, Non-Ferrous Alloys.	 Angle: Measurement and its types, method of bisecting. Triangle-different types Rectangle, Square, Rhombus, Parallelogram. Circle and its elements.
7.	Mass, Weight and Density: Mass, Unit of Mass, Weight, difference between mass and weight, Density, unit of density, specific gravity of metals.	Free hand drawing of - Lines, polygons, ellipse, etc Geometrical figures and blocks with dimension - Transferring measurement from the given object to the free hand sketches.
8.	Speed and Velocity: Rest and motion, speed, velocity, difference between speed and velocity, acceleration, retardation, equations of motions, simple related problems.	- Construction of Scales and diagonal scale
9.	Work, Power and Energy: Work, unit of work, power, unit of power, Horse power of engines, mechanical efficiency, energy, use of energy, potential and kinetic energy, examples of potential energy and kinetic energy.	Dimensioning: - Definition, types and methods of dimensioning (functional, non-functional and auxiliary) - Types of arrowhead - Leader Line with text
10.		Method of presentation of Engineering Drawing - Pictorial View - Orthogonal View - Isometric view

	Second Semester Duration: Six Months			
S No.	Workshop Calculation and Science	Engineering Drawing		
1.	Algebra: Addition, Subtraction, Multiplication, Division, Algebraic formula, Linear equations (with two variables).	Dimensioning practice: Position of dimensioning (unidirectional, aligned, oblique as per BIS SP:46-2003) Symbols preceding the value of dimension and dimensional tolerance. Text of dimension of repeated features, equidistance elements, circumferential objects		
2.	Mensuration: Area and perimeter of square, rectangle, parallelogram, triangle, circle, semi-circle. Volume of solids – cube, cuboids, cylinder and Sphere. Surface area of solids – cube, cuboids, cylinder and Sphere.	Construction of Geometrical Drawing Figures: Different Polygons and their values of included angles. Inscribed and Circumscribed polygons. Conic Sections (Ellipse& Parabola)		
3.	Trigonometry: Trigonometrical ratios, measurement of angles. Trigonometric tables	- Drawing of Solid figures (Cube, Cuboids, Cone, Prism, Pyramid, Frustum of Cone and Pyramid) with dimensions.		
4.	Heat & Temperature: Heat and temperature, their units, difference between heat and temperature, boiling point, melting point, scale of temperature, relation between different scale of temperature, Thermometer, pyrometer, transmission of heat, conduction, convection, radiation.	Symbolic Representation (as per BIS SP:46-2003) of: - Fastener (Rivets, Bolts and Nuts) - Bars and profile sections - Weld, brazed and soldered joints - Piping joints and fittings		
5.	Basic Electricity: Introduction, use of electricity, how electricity is produced, Types of current_ AC, DC, their comparison, voltage, resistance, their units. Conductor, insulator, Types of connections – series, parallel, electric	Free Hand sketch of hand tools and measuring tools used in respective trades.		

	power, Horse power, energy, unit of	
	electrical energy.	
6.	Levers and Simple Machines: levers and its types. Simple Machines, Effort and Load, Mechanical Advantage, Velocity Ratio, Efficiency of machine, Relationship between Efficiency, velocity ratio and Mechanical Advantage.	Projections: - Concept of axes plane and quadrant - Orthographic projections - Method of first angle and third angle projections (definition and difference) Symbol of 1 st angle and 3 rd angle projection as per IS specification.
7.		Drawing of Isometric projection from Orthographic projection
8.		Drawing of Orthographic projection from isometric/3D view of blocks
9.		Orthographic Drawing of simple fastener (Rivet, Bolts, Nuts & Screw)
10.	- 200	Drawing details of two simple mating blocks and assembled view.

	Third Semester Duration: Six Months			
S No.	Workshop Calculation and Science	Press Tools, Jigs & Fixtures Design Drawing (on board)		
1.		Design an open type Drill Jig (03 hrs)		
2.	- Area of cut-out regular surfaces: circle and segment and sector of circle.	Design an indexing type Drill Jig (03 hrs)		
3.	Area of irregular surfaces.Application related to shop problems.	Design a single component holding milling fixture (03hrs)		
4.	Volume of cut-out solids: hollow cylinders, frustum of cone, block section.Volume of simple machine blocks.	Design a gang milling fixture(03 hrs)		
5.	- Material weight and cost problems related to trade.	Design of Guide plate tool(06 hrs)		
6.	- Finding the value of unknown sides and angles of a triangle by Trigonometrical method.			
7.	- Finding height and distance by trigonometry.	Draw a progressive tool with fixed stop (06 hrs).		
8.	- Application of trigonometry in shop problems. (viz. taper angle calculation).	******		
9.	 Forces definition Compressive, tensile, shear forces and simple problems. Stress, strain, ultimate strength, factor of safety. Basic study of stress-strain curve for MS. 	Design of progressive tool with front acting trigger stop with detail drawing (09 hrs).		
10.	- Temperature measuring instruments. Specific heats of solids & liquids.	- कुशल भारत		
11.	- Thermal Conductivity, Heat loss and heat gain.			
12.	Average Velocity, Acceleration &Retardation.Related problems.	Design a progressive tool with side cutter (06 hrs)		
13.	- Circular Motion: Relation between circular motion and Linear motion, Centrifugal force, Centripetal force			
14.		Design a compound tool with direct knock out (06 hrs)		
15.				

16.	 Design a "V" bending tool (03 hrs)
17	Design a progressive tool parting off methods (06 hrs)
18	
19	Design a compound tool with indirect knock out (06 hrs)

	Fourth Semester Duration: Six Months			
S No.	Workshop Calculation and Science	Press Tools, Jigs & Fixtures Design Drawing		
1.	Graph:	Design a "U" bending tool (03 hrs)		
	Read images, graphs, diagramsbar chart, pie chart.Graphs: abscissa and ordinates, graphs of straight line, related to two sets of varying quantities.			
2.	Simple problem on Statistics: - Frequency distribution table - Calculation of Mean value - Examples on mass scale productions -Cumulative frequency -Arithmetic mean	Design a simple draw open tool (06 hrs)		
3.	Acceptance of lot by sampling method (within specified limit size) with simple examples (not more than 20 samples).	Design a progressive tool with cut and carry method (06 hrs)		
4.	 - Friction- co-efficient of friction, application and effects of friction in Workshop practice. Centre of gravity and its practical application. 	India		
5.	 Magnetic substances- natural and artificial magnets. Method of magnetization. Use of magnets. 	Design a Guide plate tool in AutoCAD(06 hrs) in AutoCAD		
6.	Electrical insulating materials.Basic concept of earthing.	9		
7.	 Transmission of power by belt, pulleys & gear drive. Calculation of Transmission of power by belt pulley and gear drive. 	Draw a progressive tool with fixed stop in AutoCAD (06 hrs)		
8.	- Heat treatment and advantages.			
9.	Concept of pressure – units of pressure, atmospheric pressure, absolute pressure, gauge pressure – gauges used for measuring pressure	Design a compound tool with direct knock out (06 hrs) in AutoCAD		

10.	Design of progressive tool with front acting trigger stop with detail drawing (09 hrs).
11	Design a progressive tool with side cutter (06 hrs)
12	Project drawings in AutoCAD

9.2 EMPLOYABILITY SKILLS

(DURATION: 110 HOURS)

CORE SKILL – EMPLOYABILITY SKILL					
	First Semester				
1. English Literacy	Duration: 20 hrs Marks: 09				
Pronunciation	Accentuation (mode of pronunciation) on simple words, Diction (use of word and speech)				
Functional Grammar	Transformation of sentences, Voice change, Change of tense, Spellings.				
Reading	Reading and understanding simple sentences about self, work and environment				
Writing	Construction of simple sentences Writing simple English				
Speaking/ Spoken English	Speaking with preparation on self, on family, on friends/ classmates, on known people, picture reading, gain confidence through role-playing and discussions on current happenings, job description, asking about someone's job habitual actions. Cardinal (fundamental) numbers ordinal numbers. Taking messages, passing on messages and filling in message forms, Greeting and introductions, office hospitality, Resumes or curriculum vitae essential parts, letters of application reference to previous communication.				
2. IT Literacy	Duration: 20 hrs Marks: 09				
Basics of Computer	Introduction, Computer and its applications, Hardware and peripherals, Switching on-Starting and shutting down of computer.				
Computer Operating System	Basics of Operating System, WINDOWS, the user interface of Windows OS, Create, Copy, Move and delete Files and Folders, Use of External memory like pen drive, CD, DVD etc., Use of Common applications.				
Word Processing and Worksheet	Basic operating of Word Processing, Creating, opening and closing Documents, use of shortcuts, Creating and Editing of Text, Formatting the Text, Insertion & creation of Tables. Printing document. Basics of Excel worksheet, understanding basic commands, creating				

Computer Networking and Internet	simple worksheets, understanding sample worksheets, understanding sample worksheets and functions, Printing of simple expension of computer Networks (using real life of Local Area Network (LAN), Wide Area Network of Internet (Network of Networks), Meaning of World Wide Web (WWW), Web page and Search Engines. Accessing the Internet Downloading and Printing Web Pages, Open use of email. Social media sites and its impliful Information Security and antivirus tools, Do' Information Security, Awareness of IT - ACC	examples), Definitions of work (WAN), Internet, Browser, Website, Web rnet using Web Browser, ing an email account and cation. s and Don'ts in
3. Communication Ski	lls	Duration: 15 hrs Marks: 07
Introduction to Communication Skills	Communication and its importance Principles of effective communication Types of communication - verbal, non-verbal, written, email, talking on phone. Non-verbal communication-characteristics, components-Paralanguage Body language Barriers to communication and dealing with barriers. Handling nervousness/ discomfort.	
Listening Skills	Listening-hearing and listening, effective list effective listening, guidelines for effective list Triple- A Listening - Attitude, Attention & A Active listening skills.	stening.
Motivational Training	Characteristics essential to achieving success The power of positive attitude. Self-awareness Importance of commitment Ethics and values Ways to motivate oneself Personal goal setting and employability plant	गरत
Facing Interviews	Manners, Etiquettes, Dress code for an interview.	view.
Behavioral Skills	Problem Solving Confidence Building Attitude	

	Second Semester		
4. Entrepreneurship Sk	ills	Duration: 15 hrs Marks: 06	
Concept of Entrepreneurship	Entrepreneur - Entrepreneurship - Enter Entrepreneurship vs. management, Entrepreneurship vs. management, Entrepreneurship vs. Role & Function of to the enterprise & relation to the economy, Entrepreneurial opportunities, The process of	preneurial motivation. entrepreneurs in relation Source of business ideas,	
Project Preparation & Marketing analysis	Qualities of a good Entrepreneur, SWOT and Risk Analysis. Concept & application of PLC, Sales & distribution Management. Different Between Small Scale & Large Scale Business, Market Survey, Method of marketing, Publicity and advertisement, Marketing Mix.		
Institutions Support	Preparation of Project. Role of Various Schemes and Institutes for self-employment i.e. DIC, SIDA, SISI, NSIC, SIDO, Idea for financing/ non financing support agencies to familiarizes with the Policies /Programmes & procedure & the available scheme.		
Investment Procurement	Project formation, Feasibility, Legal formal Estimation & Costing, Investment procedur Banking Processes.		
5. Productivity		Duration: 10 Hrs. Marks: 05	
Benefits	Personal / Workman - Incentive, Production Improvement in living standard.		
Affecting Factors	Skills, Working Aids, Automation, Environ improves or slows down.	ment, Motivation - How	
Comparison with developed countries	Comparative productivity in developed of Japan and Australia) in selected industries e Mining, Construction etc. Living standards	e.g. Manufacturing, Steel,	
Personal Finance Management	Banking processes, Handling ATM, KYC rehandling, Personal risk and Insurance.	egistration, safe cash	
6. Occupational Safety,	Health and Environment Education	Duration: 15 Hrs. Marks: 06	
Safety & Health	Introduction to Occupational Safety and He and health at workplace.		
Occupational Hazards	Basic Hazards, Chemical Hazards,	Vibroacoustic Hazards,	

	Occupational health, Occupational hygiend Disorders & its prevention.	ic, Occupational Diseases/	
Accident & safety	Basic principles for protective equipment. Accident Prevention techniques - control of accidents and safety measures.		
First Aid	Care of injured & Sick at the workplaces, F of sick person.	irst-Aid & Transportation	
Basic Provisions	Idea of basic provision legislation of India. safety, health, welfare under legislative of I	ndia.	
Ecosystem	Introduction to Environment. Relationship Environment, Ecosystem and Factors causing	<u>-</u>	
Pollution	Pollution and pollutants including liquid, gas hazardous waste.	aseous, solid and	
Energy Conservation	Conservation of Energy, re-use and recycle		
Global warming	Global warming, climate change and Ozone	e layer depletion.	
Ground Water	Hydrological cycle, ground and surface wat Harvesting of water.		
Environment	Right attitude towards environment, Mainte environment.	enance of in -house	
7. Labour Welfare Leg	gislation	Duration: 05 Hrs. Marks: 03	
Welfare Acts	Benefits guaranteed under various acts- Fac Act, Employees State Insurance Act (ESI), Employees Provident Fund Act, The Works	Payment Wages Act,	
8. Quality Tools		Duration: 10 Hrs. Marks: 05	
Quality Consciousness	Meaning of quality, Quality characteristic.	_	
Quality Circles	Definition, Advantage of small group activity, objectives of quality Circle, Roles and function of Quality Circles in Organization, Operation of Quality circle. Approaches to starting Quality Circles, Steps for continuation Quality Circles.		
Quality Management System	Idea of ISO 9000 and BIS systems and its importance in maintaining qualities.		
House Keeping	Purpose of House-keeping, Practice of good Housekeeping.		
Quality Tools	Basic quality tools with a few examples.		

TOOL AND DIE MAKER (PRESS TOOL, JIGS & FIXTURE)

LIST OF TOOLS AND EQUIPMENT (For batch of 16 candidates)

A. TRAINEES TOOL KIT

S No.	Name of the Tool &Equipments	Specification	Quantity
1.	Steel Rule	150 mm English and Metric combined	16 nos.
2.	Engineers Square	100 mm with knife edge	16 nos.
3.	Hacksaw frame adjustable with pistol grip	200-300 mm blade	16 nos.
4.	Centre punch	100 mm	16 nos.
5.	Dot punch	100 mm	16 nos.
6.	File flat bastard	300 mm	16 nos.
7.	File flat 2nd cut	250 mm	16 nos.
8.	Cleaning bench brush	0.0000	16 nos.
9.	File flat safe edge	200 mm	16 nos.
10.	Cleaning brush	1"	16 nos.
11.	File triangular smooth	150 mm	16 nos.
12.	Hammer cross peen	0.5 kg	16 nos.
B: TOO	LS AND EQUIPMENTS		
13.	Screw driver	150 mm	5 nos.
14.	Screw driver	200 mm	5 nos.
15.	Cleaning brush		5 nos.
16.	Oil can	250 ml	1 nos.
17.	File flat smooth	200 mm	5 nos.
18.	File flat second cut with safe edge	200 mm	5 nos.
19.	File half round bastard	300 mm	5 nos.

20.	File half round second cut	250 mm	5 nos.
21.	File triangular bastard	250 mm	5 nos.
22.	File triangular second cut	200 mm	5 nos.
23.	File round bastard	250 mm	5 nos.
24.	File square bastard	300 mm	5 nos.
25.	File square second cut	250 mm	5 nos.
26.	Knife edge file	150 mm	5 nos.
27.	Needle file assorted (12 nos.)	150 mm	5 nos.
28.	File card/ file spattle	Sec.	5 nos.
29.	Scraper flat	250 mm	5 nos.
30.	Hammer Ball Peen	0.5 kg with handle	5 nos.
31.	Hammer Cross Peen	0.5 kg with handle	5 nos.
32.	Chisel cold flat	18 x 150 mm	10 nos.
33.	Chisel Cross Cut	10 x 3 x 200 mm	5 nos
34.	Chisel Half Round	10 x 250 mm	5 nos
35.	Chisel diamond point Chipping guard(Bench stop)	10 x 200 mm	5 nos 10 nos
36.	Scribing block universal	300 mm	2 nos
37.	C.I. Surface plate	300 x 300 mm	2 nos
38.	Granite Surface plate	600 x 600x80 mm	1 no
39.	Tap extractor	3 mm to 12 mm x 1.5 mm (easy out)	2 set
40.	Screw extractor sizes	1 to 8	2 set
41.	Taps and dies metric	5 mm to 12 mm complete set in a box	2 sets
42.	Twist Drill with St. Shank	Ø 1 to Ø 12 mm in steps of 0.5 mm	3 set
43.	Twist Drills	Dia 3.2, 4.1, 4.2, 5.2, 6.8, 8.5, 3.8, 4.8, 5.8, 7.7, 9.7, 11.7	2 nos. each
44.	Taper shank drills	Ø 12 mm to Ø 20 mm in steps of 1 mm	1 set

45.	D.E spanners	3-4, 6-8, 10-12, 13-14, 15-16, 18-19, 20-22, 24-26 (8 spanners)	2 sets
46.	Letter punch	5 mm set	3 set
47.	Number punch	5 mm set	3 set
48.	Drill chuck	12 mm capacity with key	4 no.
49.	Allen key metric	3 to 12 mm set	3 sets
50.	Centre drills	No. 3, 4 & 5	5 each
51.	Parallel hand reamer	6 mm to 12 mm in steps of 2 mm with suitable wrench	2 set
52.	Star dresser	Qc.	2 nos.
53.	Diamond dresser with holder		2 nos.
54.	Safety goggles (Personal Protective Equipments)		10 nos.
55.	Demagnetizer		1 no.
56.	Snips	200 mm	1 no.
57.	Workbench	150 cm x 80 cm x 75 cm with 150 mm vice (Each bench fitted with 2 vices)	10 nos.
58.	Bench Vice	150 mm	20 nos.
59.	Steel lockers for 20 trainees (Pigeon Cup Board)	HIGHG	2 nos.
60.	Steel cupboard	180 cm x 60 cm x 45 cm	6 nos.
61.	Metal rack	180 cm x 60 cm x 45 cm	1 nos.
62.	Fire extinguisher	<u> </u>	2 nos.
63.	Fire buckets with stand		2 nos.
64.	Feeler gauge	0.05 mm to 0.3 mm by 0.05 and 0.4 mm to 1 mm by 0.1 mm (13 leaves)	2 set
65.	Metric Screw pitch gauge-Range	0.4 -6 mm pitch 600 (21 leaves)	2 set
66.	Radius gauge	1 - 3 mm by 0. 25 mm and 3.5-7mm by 0.5 mm (34 leaves)	2 no.
67.	Vernier height gauge	Range 300 mm, with 0.02	2 no.

		mm least count	
68.	Universal vernier caliper-Range	200 mm, with 0.02 mm least count	5 nos.
69.	Dial vernier caliper	0-150 mm, with 0.02 mm least count	2 nos.
70.	Vernier caliper-Range	300 mm Vernier scale 0.02 mm	2 nos.
71.	Vernier bevel protractor-Blade range	150 and 300 mm, dial 1 ⁰ , least count 5 (min.) with head, Acute Angle attachment	1 nos.
72.	Outside micrometer	0-25 mm, with 0.01 mm least count	5 nos.
73.	Outside micrometer	25-50 mm, with 0.01 mm least count	5 nos.
74.	Outside micrometer	50-75mm, with 0.01 mm least count	5 nos.
75.	Combination square sets	300 mm blade with square head, centre head, protractor head	1 set
76.	Telescopic gauge range	8 -150 mm (6 pcs/set)	1 set
77.	Sine bar with stopper plate	150 mm	1 no.
78.	Sine table with magnetic bed	200 mm length	1 no.
79.	Slip Gauge Box (workshop grade)	87 pieces per set	1 set
80.	Gauge block accessories consisting holders, half round jaws, scriber point, centre point, triangular straight edge (14 pcs/set)	HUIC	1 set
81.	Central square Size	400 x 250 mm blade	1 no.
82.	V-Block-Approx.	32 x 32 x 41 mm with clamping capacity of 25 mm with clamps	2 pairs
83.	V-Block-Approx.	65x65x80 mm with clamping capacity of 50 mm with clamps	1 pair
84.	Magnetic V-Block	100x100x125 mm	2 pairs
85.	Angle plate	150 x 150 x 200 mm	2 no.
86.	Angle plate-adjustable	250x250x300 mm	1no.
87.	Inside micrometer Range	50-63 mm with std extension rods upto 200mm	1 set

	Depth micrometer	Range 0-25 mm, accuracy	1set
88.		0.01 mm with std set of	
	Magnetic stand with magnetic base	extension rods. 60 x 47.5 mm and with	2 nos.
89.	Wagnetic stand with magnetic base	universal swivel clamp, dial	2 1105.
٥٫٠		holding rod (150 mm) scriber	
	Dial test indicator-Lever type- Range	0-0.8 mm Graduation	2 nos.
		0.01mm,	
90.		reading 0-50-0 with	
		accessories	
	Dial test indicator Plunger type-Range	0-10 mm, Graduation 0.01	2 nos.
91.	2 m tost material 1 mager type 1 mage	mm, Reading 0-100 with	_ 1105.
		revolution counter	
	Bore gauge with dial indicator	(1 mm range, 0-0.01 mm	1 set
92.	100	graduation)-Range of bore	
	180	gauge 18-150 mm Range of 7 – 18 mm	
0.2	Straight edge-Single beveled-Size	100 mm and 150 mm	5 each
93.		le l	
94.	Tool makers clamp	50 mm & 75 mm	5 nos. each
95.	C clamp	50 mm & 75 mm	2 nos. each
	Pin Gauge set	54.	1 set
0.4			
96.	A-0	1 9	
96.	CZZ	India	
	SZI	India	
	OLS & EQUIPMENT OF ELECTRICAL	& SENSORS

110.	Side and face milling cutter	Ø 100 x 10 X Ø 27 mm	2 nos.
111.	Side and face cutter	Ø 80 x 10 X Ø 27 mm	2 nos.
112.	Cylindrical milling cutter	Ø 63 x 70 x Ø 27 mm	2 nos.
113.	Slitting Saw cutter	Ø 75 x 4 X Ø 27 mm	2 nos.
114.	Slitting Saw cutter	Ø 100 x 6 X Ø 27 mm	2 nos.
115.	Single angle cutter	Ø 75 x 16 x Ø 27mm – 60 ⁰	2 nos.

116.	Dovetail cutter	Dia 20 X 8 mm shank x 60 ⁰	2 nos.
117.	Single angle cutter	Ø 75 x 20 x Ø 27 – 45 ⁰	2 nos.
118.	Equal angle cutter	Ø75x 30 x Ø 27 - 90 ⁰	2 nos.
119.	Shell End Mill	Ø 50 x 36 x Ø 22 (preferably inserted tip type)	2 nos.
120.	Shell End Mill	Ø 75 mm x 50 x Ø 22 (preferably inserted tip type)	2 nos.
121.	Parallel shank end mills	Ø6, Ø10 and Ø 16 are (double fluted), Ø 20 mm & Ø 25mm (four fluted)	4 nos. each
122.	T slot cutter with parallel shank	Ø 17.5 x 8 mm width x dia. of shank 8 mm	2 nos.
123.	Concave Milling cutter	Ø 63 x 6 radius/10 radius x Ø 27 mm	1 no. each
124.	Convex Milling cutter	Ø 63 x 6 radius / 10 radius x Ø 27 mm	1 no. each
125.	Disc type form milling cutter	(involutes form -2 module, 20° pressure angle) (for gear cutting)	1 set
126.	Tool holder (straight) to suit	6, 8 mm sq. bit size	2 nos. each
127.	Parting tool holders to suit	3 and 4 mm thick tool blade.	2 nos.
128.	Boring bars with holders	to accommodate 4, 6 and 8 mm HSS tool bits	3 each
129.	Knurling tool (straight & diamond)	HILLIC	2 nos. each
E. GEN	NERAL MACHINERY & INSTALLATIO	N:	
130.	Sensitive drilling machine	capacity 1 to 13mm Motorized –with drill chuck and key etc.	1 no.
131.	Pillar/column type Drilling machine	25 mm capacity-motorized with drill chuck, key etc	1 no.
132.	Radial Drill machine to drill up to	32 mm diameter.	1 no.
133.	Power hacksaw machine to accommodate	21" or more length blade.	1no.
134.	Double ended Pedestal Grinder with	178 mm wheels(one fine and one rough wheel)	1 no.
135.	SS and SC centre lathe (all geared) with	centre height 150 mm and centre distance 1000 mm along with 3 jaws, 4 jaw chuck, auto feed system, taper turning attachment,	3 nos.

		Coolant pump, safety guard and machine light arrangement.	
136.	Shearing machine (lever type)hand operated complete with	300 mm blade length	1 no.
137.	Arc and gas welding and cutting equipment the Institute)	t (Not required if Welding Trade i	s available in
	(i) Transformer welding set 300 amps- continuous welding current with all accessories and electrode holder		1 no.
	(ii) Welding cable to carry 400 amps 50 meter with flexible rubber cover		1 set
	(iii) Lugs for cable		4 nos.
	(iv) Earth clamps	64	2 nos.
	(v) Arc welding table (all metal top)	100	1 set
	(vi) Oxy-acetylene gas welding set- equipment with hoses, regulator and other accessories		1 no.
	(vii) Gas welding table with positioner	HCERA	1 set
	(viii) Welding torch tips of different sizes	54	4 nos.
	(ix) Gas lighter	lo olio	1 no.
	(x) Trolley for gas cylinders	Hule	1 no.
	(xi) Chipping hammer		1 no.
	(xii) Gloves (Leather)	• कशल भारत	1 pair
	(xiii) Leather apron	9	1 no.
	(xiv) Welding torches 5 to 10 nozzles		1 set
	(xv) Spindle key for cylinder valve		1 no.
	(xvi) Welding goggles		2 pair
	(xvii) Welding helmets with coloured glass		10 sets
	(xviii) Tip cleaner		2 nos.

147.	Multimedia CNC teach ware and simulation software		2 nos.
148.	Desktop computers with latest configuration suitable for CAD/CAM necessary furniture		As per Annex-A
149.	CNC milling machine/ Vertical machining centre (VMC)	[specification as per Annex-A & A (II)]	As per Annex-A & A (II)
150.	CNC lathe/CNC turn Centre	[specification as per Annex-A & A (I)]	As per Annex-A & A (I)
151.	Co-ordinate measuring machine (optional)		01

152.	Profile projector (optional)		01
153.	Fly press (any model	Minimum 2 tonne capacity	2 nos.
154.	Power press m/c (mechanical/Hydraulic)	Minimum 5 tonne capacity standard and required optional accessories	1 no.
F. SOF	TWARES		
155.	Auto CAD	Latest version	21 Licence
156.	Solid Works	Latest Version	21 Licence

NOTE:

- 1. No additional items are required to be provided to the batch working in the second and third shift except the items under trainee's toolkit.
- 2. Institute having centralized computer lab may use the existing infrastructure to impart simulation training.

	TOOLS & EQUIPMENTS FOR EMPLOYABILITY SKILLS				
S No.	Name of the Equipment	Quantity			
1.	Computer (PC) with latest configurations and Internet connection with standard operating system and standard word processor and worksheet software	10 nos.			
2.	UPS - 500VA	10 nos.			
3.	Scanner cum Printer	1 no.			
4.	Computer Tables	10 nos.			
5.	Computer Chairs	20 nos.			
6.	LCD Projector	1 no.			
7.	White Board 1200mm x 900mm	1 no.			

Note: Above Tools & Equipments not required, if Computer LAB is available in the institute.

ANNEXURE-A

	CNC Lab					
	Space and Power Requirement					
1	Space a Space Required (in Sq. Meter)	ind Power I	40 (For below 65 (For above)			
2	Power Required (in KW)		6 (For below 12.5 (For 4	4 (2+2) un	its))

S. N.	Name of Item	Category	Quan 4 (2+2) units & Above	Below 4 (2+2) units	Unit	Remark
1	CNC turn Centre [specification as per Annex-A (I)]	Machine	1	NIL	No.	Refer Instructions
2	CNC Vertical Machining Centre [specification as per Annex-A (II)]	Machine	1	NIL	No.	Refer Instructions
3	Multimedia based simulator for CNC technology and interactive CNC part programming software for turning & milling with virtual machine operation and simulation using popular operation control system such as Fanuc, Siemens, etc. (Web-based or licensed based) (12 trainees + 1 faculty) With help of this software the trainees should be able to Write, Edit, Verify & Simulate	Software	17 C	17	users	
4	Desktop Computers compatible to run simulation software with LAN facility	Machine	17	17	No.	
5	Printer - (Laser/ Inkjet)	Machine	1	1	No.	Optional
6	Air Conditioner - Split - 2.0 Ton	Machine	1	1	No.	Optional
7	UPS - 2 KVA	Machine	1	1	No.	Optional

a)

Tool & Die Maker (Press Tools, Jigs & Fixtures)

Instructions

For units less than 4(2+2), ITI can enter into MoU with Facilitator who will provide the Training to Trainees admitted and undergoing training in above Trades.

The Facilitator should be Government ITI, Engineering/ Polytechnic College, Recognized Training Institute, Industry, Private ITI (Facilitators are arranged in descending preference order). The Facilitator should have all the above training infrastructure. (Including CNC Machines and Multimedia software for CNC). If any of the facility is not available with facilitator then the same should be provided in the ITI. The facilities of CNC should be made available to ITI trainees at the time of examination. This clause should be part of MoU to be signed. The training provider must be within the range of 15 Km or within city whichever is less.

b) **NOTE: -** "It is on the discretion of the ITI that it may procure CNC simulation software with extra features in addition to the specification defined against CNC simulator".

64

ANNEXURE-A (I)

Detai	led specification for CNC Lathe		
1.	MACHINE CAPACITY	Units	Size
a	Max. load on Chuck	Kg	Maximum 40
b	Machine weight nett	kg	1500 or higher
2.	SPINDLE	, J	, , , , , , , , , , , , , , , , , , , ,
a	Maximum spindle speed	RPM	4000 or higher
b	Type of drive		AC servo spindle motor (digital)
С	Front Bearing Dia. (ID)	mm	60 or higher
3.	AXES		
a	X - axis Travel	mm	200 or higher
b	Z - axis Travel	mm	290 or higher
c	Rapid traverse - X	m/min	10/15 or higher
d	Minimum programmable command- X/ Z	mm	0.001
e	Programmable feed range - X, Z axes	mm/mir	1 10 - 10000
f	Type of drive	46 U.	AC servo motor
g	Motor Torque - X axes	Nm	3 or higher
h	Motor torque - Z axis	Nm	6 or higher with brake
5.	ACCURACY as per ISO 230-2		
a	Positioning accuracy for X,Y & Z axes	mm	0.012
b	Repeatability for X,Y & Z axes	mm	± 0.007
6.	CNC SYSTEM		
a	Control System	FANUC	C/Siemens
b	Machine control panel	Feed rat	te, spindle speed override knob
c	MPG (Manual pulse generator)	On mac	hine operator panel
d	CNC Features	Tool Of	fsets MDI
7.	COOLANT/LUBRICATION		
a	Coolant tank Capacity	Litres	100 or higher
b	Coolant pump motor	kW	0.25
c	Coolant pump output	lpm	20 or higher
8.	POWER SOURCE		
a	Mains supply (± 10 %)		415 V, 3 Ph., 50Hz
b	Total connected load requirement		Approx. 15 kVA
9.	STANDARD EQUIPMENT		
a	Voltage Stabilizer	15 kVA	
b	Backup CD for PLC Ladder Logic	1 no.	
c	Machine lightning	1 no.	
d	Levelling pads and jacking screws	4 nos.	
e	Operation manual	1 no.	
f	Maintenance manual	1 no.	
g	Installation kit	1 no.	

h	Maintenance tool kit	1 n	0.			
10.	MAKES OF CRITICAL COMPONEN	ITS				
a	LM Guideways	HIV	VIN/THK/F	PMI/STAR		
b	Ball Screws	HIV	VIN/THK/7	ΓSUBAKI/PM	I/STAR/F	IMT/N

1.	MACHINE CAPACITY	Units	Size
a	Table size	mm	500x250 or higher
b	Max. load on table	Kg	150 or higher
c	T slot dimension (N x W x P)	mm	3 x 14 x 100 or higher
d	Table height from floor	mm	800 ~ 900
e	Cast Iron grade for bed and saddle		Grade 25 or equivalent
f	Machine net weight	kg	1500 or higher
).	SPINDLE		,
a	Spindle nose		BT30 / BT40
b	Minimum distance (spindle nose to table)	mm	100 - 150
d	Maximum spindle speed	RPM	6000 or higher
e	Spindle power, continuous	kW	3.7 or higher
f	Type of drive	-1.79	AC servo spindle motor (digital)
g	Spindle bearing class		P4
h	Front Bearing Dia. (ID)	mm	50 or higher
3.	AXES		,
a	X - axis Travel	mm	300 or higher
b	Y - axis Travel	mm	250 or higher
c	Z - axis Travel	mm	250 or higher
d	Rapid traverse - X/Y/Z	m/min	20/20/20 or higher
e	Minimum programmable command- X/Y/ Z	mm	0.001
f	Programmable feed range - X, Y & Z axes	mm/min	10 - 10000
g	Type of drive		AC servo motor
h	Motor Torque - X & Y axes	Nm	3 or higher
i	Motor torque - Z axis	Nm	6 or higher with brake
j	Ball screw - X, Y & Z axes (diameter x pitch)	mm	25 x 10 or higher
k	Ball screw finish - X, Y & Z axes		Ground and hardened
1	Ball screw class - X, Y & Z axes		Pre-loaded with C3 or better
m	Guideways - X, Y & Z axes		Antifriction linear motion guideway
n	Guideways size - X, Y & Z axes	mm	25 or higher
О	Guideway precision - X, Y, & Z axes		P Class
1.	AUTOMATIC TOOL CHANGER		
a	Number of tool pockets	Nos	8 or higher
b	Max tool diameter	mm	80 or higher
c	Tool selection		Bi-directional
d	Tool shank type		BT30 / BT40

e	Tool weight max	kg	2.5 for BT30 / 6 for BT40					
f	I		100 ~150 for BT30 / 150~200 for BT40					
g	Tool change time (chip to chip)	mm sec	5 or lower					
h	Tool clamp & unclamp		Disc Spring & Hydro-Pneumatic					
5.	ACCURACY as per ISO 230-2							
a	Positioning accuracy for X,Y & Z axes	s mm 0.012						
b	Repeatability for X,Y & Z axes	mm	±0.007					
С	Geometrical Alignment		ISO 10791-Part 1					
d	Accuracy of finish test piece		ISO 10791-Part 7					
6.	CNC SYSTEM		•					
a	Control System	FANUC/	/Siemens					
b	Motors & Drives	Compati above	ble with CNC controllers as mentioned					
С	System resolution	0.001 mr	n					
d	Tool number display		ine operator panel					
e	Machine control panel		e, spindle speed override knob
